PROJECTS

Story Squad

An innovative full-stack web application built to give children a break from the screen and interact with friends by drawing pictures and handwriting stories.

• Collaborating remotely with a team of 7 Developers. Consisting of 5 Web Developers, and 2 Data Scientists.
• Solely responsible for creating the Sign Up Page.

• Created the user account selection pop up using Ant Design Modal.
• Utilizing multiple tools such as React, PostgreSQL, and Ant Design to build out a fully authenticated web app that takes children away from the screen and gets their creative juices flowing.
