NOVEMBER 2018 — FEBRUARY 2020

- Worked well independently and on a team to solve problems.
- Organized and prioritized work to complete assignments in a timely, efficient manner.
- Served as a friendly, hardworking, and punctual employee.
- Designed and Developed WordPress websites for clients.

Education

Full-Stack Web Development, Lambda School, Remote

FEBRUARY 2020 — NOVEMBER 2020

At Lambda we were taught a wide variety of technology stacks that enable us to feel comfortable with any and all frameworks and workflows. We worked with teams from different curriculum's like IOS developers and students from the Data Science curriculum, to create full-stack applications.

Projects

Story Squad

An innovative full-stack web application built to give children a break from the screen and interact with friends by drawing pictures and handwriting stories.

• Collaborating remotely with a team of 7 Developers. Consisting of 5 Web Developers, and 2 Data Scientists.
• Solely responsible for creating the Sign Up Page.

• Created the user account selection pop up using Ant Design Modal.
• Utilizing multiple tools such as React, PostgreSQL, and Ant Design to build out a fully authenticated web app that takes children away from the screen and gets their creative juices flowing.

Todo Or Not

Todo Or Not was a fun little project creating a to-do list. This was designed and developed by me. I used the React framework and JS language to create this application.

QuizBee

QuizBee is a react app that calls to a random questions generator API and allows the user to answer the questions and upon completion of answering the questions will show the user their score along with a "play again" button. I designed and developed this app using the JS framework React.

• Designed and Wire framed using Whimsical and Figma.

• Used React library and CSS to bring the application to life.

Restful APIs

List Wait

A full-stack web application that shows users their surrounding area's restaurants wait times.

• Teck stack: Node JS, React JS, CSS, GraphQL, GitHub

• Designed wireframes/UX flow using 'Whimsical' and Figma, to ensure a complete user flow and overall mood of the project.

• Currently researching APIs to complete that will return the correct data to complete the application.

• Deployed App coming soon.
